DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 6/20/2007 has been entered.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

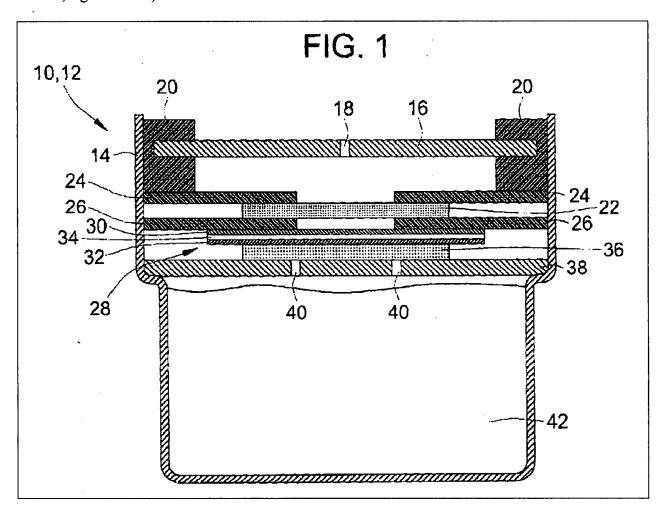

Claims 8 and 10 are rejected under 35 U.S.C. 102(e) as being anticipated by Rabbett et al. (U.S. Pat. No. 6,948,352 B2, filed 2/7/2002) ("Rabbett").

Regarding claim 8, Rabbett teaches a sensing apparatus 10 comprising: a sensor body having a membrane electrode assembly 28 comprising: an electrolyte membrane (ion exchange membrane 34); a sensing electrode 30; a counter electrode 32; and a water reservoir 42 positioned at one side of the sensor body and supplying water vapor to the membrane electrode assembly; a cap formed by gasket 20 or housing 46 comprising an opening 48; and a thin nonporous metal plate (rigid stainless steel disk 16) between the cap and the membrane electrode assembly, having a diffusion control hole (aperture 18) connected to the opening of the

Application/Control Number: 10/522,707

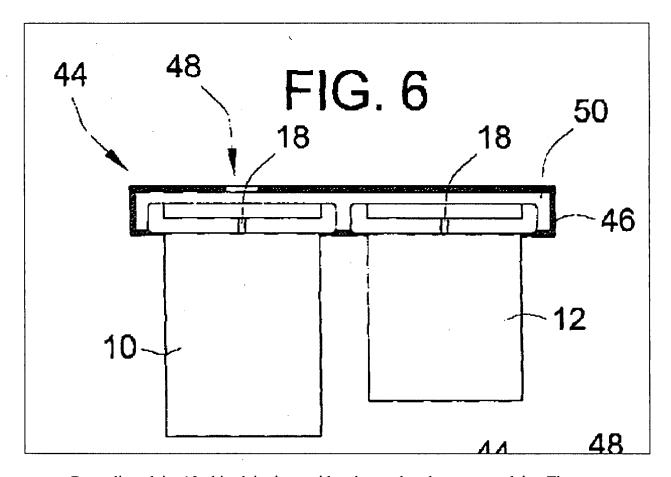

Art Unit: 1743

cap and having a smaller diameter than that of the opening of the cap (see col. 5, line 41 - col. 8, line 47; figures 1 - 6).

Application/Control Number: 10/522,707

Art Unit: 1743

Regarding claim 10, this claim is considered a product-by-process claim. The determination of patentability is based upon the apparatus structure itself. The patentability of a product or apparatus does not depend on its method of production or formation. If the product in the product-by-process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process. See *In re Thorpe*, 777 F.2d 695, 698, 227 USPQ 964, 966 (Fed. Cir. 1985) (see MPEP § 2113).

Response to Arguments

Applicant's arguments with respect to the present claims have been considered but are moot in view of the new ground(s) of rejection. The oath or declaration filed 5/21/2007 has been

considered by the examiner. A certified copy of foreign priority application JP 2001-157167 was received 5/21/2007.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian J. Sines, Ph.D., whose telephone number is (571) 272-1263. The examiner can normally be reached on Monday - Friday (11 AM - 8 PM EST).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jill A. Warden can be reached on (571) 272-1267. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
